

Mentorship Community FAQ for EXSTORE Packages

What is the Mentorship Community on Locals?

The mentorship community is intended to provide additional, clinically relevant content above and beyond what is available on the ASE SEMINARS website. This includes additional webinars, live labs, and a lot more on the clinical application of the EXSTORE™ System. The community is intended to be much more engaging and cover the in-depth nuance of practicing, thereby helping you become a much more skilled practitioner. This platform will greatly enhance your understanding of treating Orthopedic and MSK pain conditions.

The Mentorship community supports practitioners through:

- Interactive news feed where you can post case studies and other questions for Dr. Lombardi
- Growing library of webinars, podcasts, and videos
- Live Labs twice every month, also recorded
- New webinar specific to the Mentorship Community every month

For EXSTORE+ members, you have access to the recorded live labs and webinars during your one-year of membership to the community. For Elite Practitioner members, you have lifetime access to this content that extends beyond your one year of membership included in your package.

What are Live Labs?

Live Labs provide an opportunity to interact directly with Dr. Lombardi. You can bring on a patient/friend/colleague and have your techniques observed by Dr. Lombardi so he can provide feedback and guidance. Or you can just ask questions on a patient, case study, technique, practice management, and so on. All live labs are recorded and added to the community library.

What is Locals anyway?

Locals is a third-party platform that various content providers, educators, podcasters, and others use to have their own community of learning and sharing information. Locals was developed to give these people a platform to post content without having the many issues that exist on other platforms such as Facebook. It also provides a very nice look and feel that makes interacting with the content provider easy and in a familiar format. The reason we opted to use Locals for this community is due to the fact that we simply could not have built this platform, with all of its features, into our website.

How do I join?

Please note: Because Locals is a separate platform, there is a separate web address and login.

Simply go to dranthonylombardi.locals.com and create an account, there will be an option to join as a free member. After you have done so, we will upgrade you to full access. If you have any questions, please email us at support@aseseminars.com.
